## GALLIVAN SUMMER PROGRAM VISITS SOUTH END TECHNOLOGY LAB AT TENT CITY

WE ARRIVE AT FAB LAB

### DIGITAL DESIGN & FABRICATION ACTIVITY EXPRESSION PINS USING THE LASER CUTTER!

Dear Gallivan Youth,

I just wanted to let you know how excited we were to host the Gallivan Youth at the South End Technology Center @ Tent City, where they used Digital Design & Fabrication to create pins that expressed their names or interests and learned a little about graphic design by creating images of themselves as Super Heroes!

The youth were WONDERFUL and we LOVED having them. I hope they had a good time and that you know you are ALWAYS welcome at the South End Technology Center @ Tent City. Here are some really great pictures we have from the day.

Our youth teachers learned so much from their teaching practice today, too. For many, it was their first experience of teaching. They were so encouraged by the excitement and the positive response they got from the children. They reported, with puffed up chests at their success as role models, that two children even said, "I want to work here when I turn 14!" We'll definitely hire them if they apply.

Smile,  
Susan Klimczak
